

# BLUEBERRY

## POT

The ultimate solution for  
the growing of blueberry

The Bamaplast Blueberry series improves the cultivation of your blueberries.

The water needs of your plants will be fully met in every season and location thanks to the blueberry pots. The excellent drainage prevents harmful water stagnation and hinders the proliferation of pathogens, maximizing production.

The innovative bottom, specifically designed for this cultivation, ensures proper root oxygenation. The base of the pot is elevated from the ground, further improving ventilation and drainage.

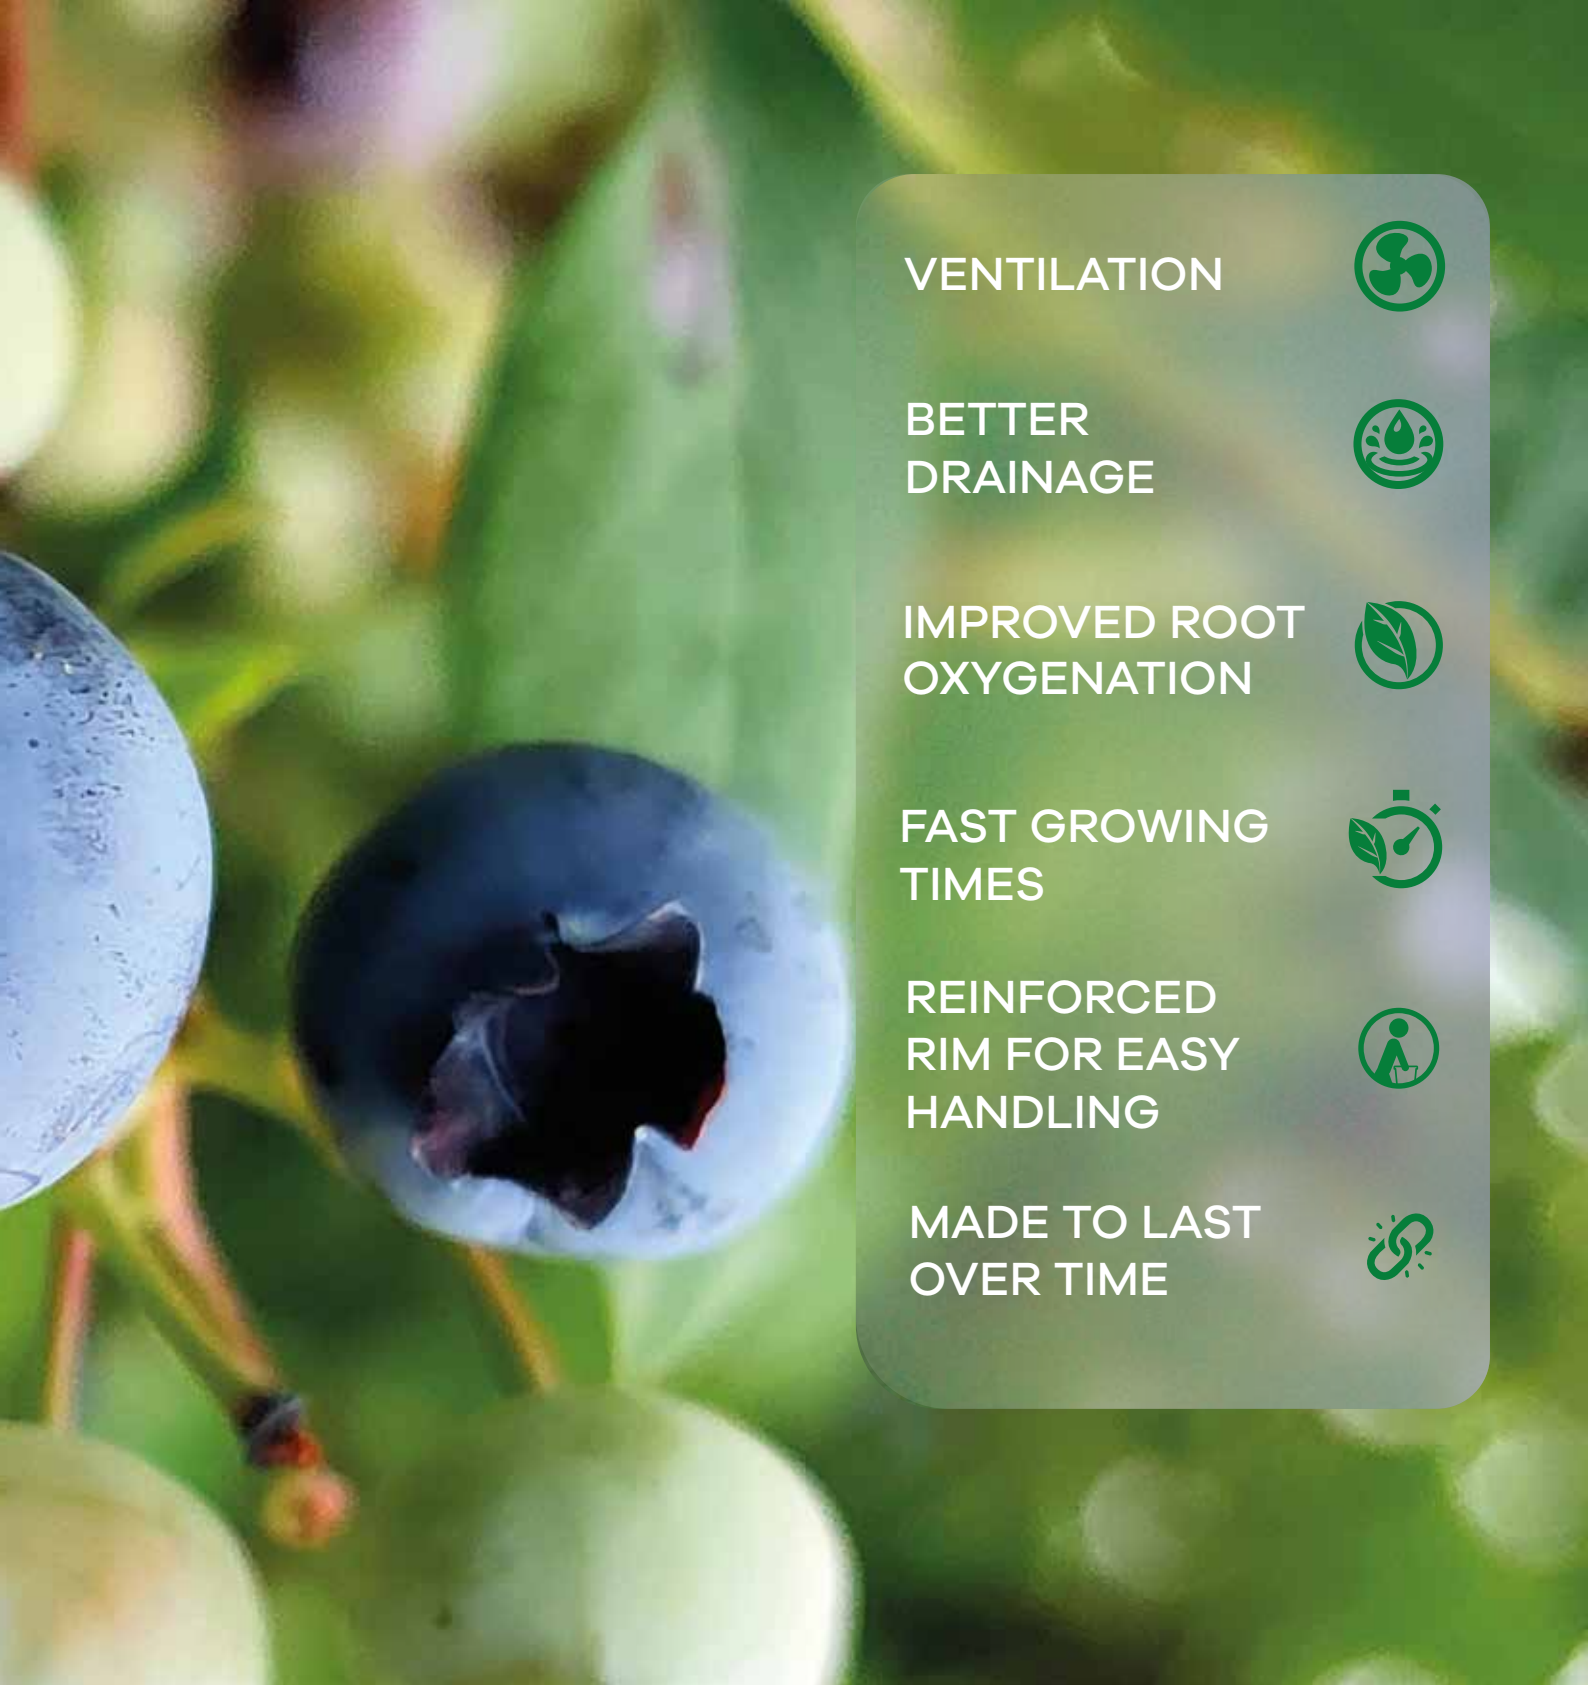

With the Bamaplast Blueberry series, your blueberries will grow like never before.

40/MR and 45/MR available with or without irrigation pipe fitting system.

VENTILATION

BETTER  
DRAINAGE

IMPROVED ROOT  
OXYGENATION

FAST GROWING  
TIMES

REINFORCED  
RIM FOR EASY  
HANDLING

MADE TO LAST  
OVER TIME

### 3 DIFFERENT SIZES
