the plastic pots

BLUEBERRY SERIES

Discover the Bamaplast **Blueberry** Series and redefine how you grow blueberries.

Imagine having full control over your plants' water needs in any season and location: with the **Blueberry** pots, this is possible.

The excellent drainage, ensured by its design specifically studied for the root system, prevents harmful water stagnation and avoids spread of pathogens from plant to plant that hurt production yield. The advanced bottom, specifically tailored for this type of cultivation, guarantees proper root oxygenation, better fertigation control and lower use of chemicals.

The raised bottom keeps the pot off the ground, allowing roots to breathe and enhance drainage through multiple holes.

With the Bamaplast **Blueberry** Series, you have everything you need to make your blueberries thrive like never before.

40/MR and 45/MR
available with or without
irrigation pipe
fitting system

35/MR
25 lt.

TIMES

MADE TO LAST
OVER TIME

MOREberry SERIES

Designed to Grow. Made to Stand Out.

From the evolution of our well-known and widely appreciated Quadro pot comes **MOREberry**. The groundbreaking pot for berry cultivation.

Advanced Anti-spiralization:

double ribbing for enhanced vertical growth.

Raised and sloped bottom:

a maximum distance of 5 cm from the ground prevents waterlogging and protects against fungal diseases.

Refined and durable feet:

the 3 cm feet fully insulate root system from the ground without compromising the pot stability.

Better drainage and aeration:

wide grid bottom and side holes ensure maximum air flow.

MOREberry is the **100% Made in Italy** pot designed for those who don't settle for compromises.

5 cm maximum height
with slope to prevent
water stagnation

3 cm high feet for better
roots isolation.

Refined grid bottom
with more open area
compared to our classic
pots with grid bottom.
